Abstract	1	Geology and ground-water resources (continued)	
Introduction.....	2	Geology of the region (continued)	
Purpose and scope of investigation.....	2	Description of rock units (continued)	
Location and extent of area.....	2	Quaternary deposits (continued)	
Previous investigations	2	Vashon recessional outwash	23
Acknowledgment.....	3	Recent alluvium	23
Characteristics of the region.....	4	Soils.....	23
Physical description.....	4	Ground water.....	25
Size of area.....	4	Well-numbering system	25
Physiography.....	4	General conditions of ground-water occurrence... ..	25
Lowlands.....	6	Perched ground water	25
Drainage	6	Unconfined ground water	25
Vegetation.....	7	Confined ground water	25
Climate	7	Occurrence of ground water within stratigraphic	
Introduction	7	units.....	25
Period of study	8	Pre-tertiary metamorphic rocks.....	25
General climatic trends.....	8	Tertiary rocks.....	25
Available data	9	Quaternary deposits	27
Surplus and deficit periods.....	10	Pre-Vashon Pleistocene deposits.....	27
Precipitation	10	Vashon advance outwash	27
Effect of topography on runoff	14	Vashon till	27
Evapotranspiration.....	15	Vashon recessional outwash	28
Temperature	17	Recent alluvium	28
Economics of the region.....	17	The water table.....	28
Cities and towns.....	17	Whatcom Basin area	28
Blaine.....	17	Upper Nooksack River valleys	28
Everson.....	18	Areas of ground-water recharge	29
Ferndale.....	18	Areas of ground-water discharge	29
Lynden.....	18	Well yields	29
Nooksack	18	Areas of high yield	29
Sumas.....	18	Areas of low yield.....	29
Agriculture	18	Mountain View Upland.....	30
Agricultural products processing.....	19	Boundary Upland	30
Manufacturing.....	19	Birch Point Upland	30
Natural resources.....	19	King Mountain Upland.....	30
Lumbering.....	19	Upper tributary valleys.....	30
Fishing.....	20	The Lummi Peninsula	30
Mineral resources	20	Lummi Island	30
Recreation	20	Point Roberts.....	31
Geology and ground-water resources	21	Estimate of water available for future use.....	31
Geology of the region	21	Existing sources.....	31
Geologic history	21	Artificial recharge.....	33
Paleozoic and Mesozoic eras	21	Surface water resources.....	34
Tertiary period.....	21	Introduction.....	34
Quaternary period	21	Streamflow characteristics.....	34
Pleistocene epoch	21	Basic streamflow data.....	40
Recent epoch	22	Bar chart of gaging station records	40
Description of rock units	22	Summary of data	40
Pre-tertiary metamorphic rocks.....	22	Ratio of discharge	41
Tertiary rocks	22	Maximum-minimum daily hydrographs.....	53
Quaternary deposits	23	Maximum, minimum, and average monthly	
Pre-Vashon Pleistocene deposits.....	23	discharge bar graphs	53
Vashon advance outwash	23	Flow-duration curves	53
Vashon till	23	Runoff map	79

CONTENTS

Figure No.	Page	Table No.	Page
53. Reservoir area and capacity curves, Deming dam site	104	6. Maximum-minimum daily discharge records, Nooksack River below Cascade Creek.....	68
54. Reservoir area and capacity curves, Shuksan dam site	105	7. Maximum-minimum daily discharge records, Canyon Creek near Kulshan.....	69
55. Reservoir area and capacity curves, North Fork dam site.....	106	8. Maximum-minimum daily discharge records, South Fork Nooksack River near Wickersham.	70
56. Reservoir area and capacity curves, Wells Creek dam site	107	9. Maximum-minimum daily discharge records, Skookum Creek near Wickersham	71
57. Reservoir area and capacity curves, Edfro Creek dam site	108	10. Maximum-minimum daily discharge records, Nooksack River near Lynden.....	72
58. Water quality problem areas caused by high iron content	118	11. Maximum-minimum daily discharge records, Fishtrap Creek at Lynden	73
59. Authorized surface water use in study area	129	12. Maximum-minimum daily discharge records, Dakota Creek near Blaine	74
60. Actual surface water use in study area.....	129	13. Maximum, minimum, and average of the monthly discharges, in acre-feet, for the period 1938-59, Nooksack River below Cascade Creek.....	75
61. Current water demands and potential available supply on Nooksack River, based on mean low flow in cubic feet per second at Lynden .	129	14. Discharge, in cubic feet per second, equaled or exceeded for specified percent of time-- 1938-59, Nooksack River below Cascade Creek.....	75
62. Present demand and potential storage at major reservoir sites studied, based on mean annual runoff in acre-feet at Lynden	129	15. Maximum, minimum, and average of the monthly discharges, in acre-feet, for the period 1949-53, Canyon Creek at Kulshan.....	75
63. Areas served by municipal and community water systems	134	16. Discharge, in cubic feet per second, equaled or exceeded for specified percent of time-- 1949-53, Canyon Creek at Kulshan.....	75

PLATES

Plate No.	(Plates 1 - 9 in pocket)	Table No.	Page
1.	Geologic map of Nooksack River basin and certain adjacent streams.	25.	Maximum, minimum, and average of the monthly discharges, in acre-feet, for the period 1949-59, Skookum Creek near Wickersham.
2.	Geologic cross sections of lower Nooksack River basin.	20.	Discharge, in cubic feet per second, equaled or exceeded for specified percent of time-- 1949-59, Skookum Creek near Wickersham.
3.	Ground-water supply in Nooksack River basin and certain adjacent streams.	21.	Maximum, minimum, and average of the monthly discharges, in acre-feet, for the period 1945-59, Nooksack River near Lynden
4.	Surface water map of Nooksack River basin and certain adjacent streams (Eastern Upland portion).	22.	Discharge, in cubic feet per second, equaled or exceeded for specified percent of time-- 1946-59, Nooksack River near Lynden
5.	Surface water map of Nooksack River basin and certain adjacent streams (Whatcom Basin portion).	23.	Maximum, minimum, and average of the monthly discharges, in acre-feet, for the period 1949-59, Fishtrap Creek at Lynden.....
6.	Runoff map of Nooksack River basin and certain adjacent streams.	24.	Discharge, in cubic feet per second, equaled or exceeded for specified percent of time-- 1949-59, Fishtrap Creek at Lynden.....
7.	Flood control zone and flood inundation area in Nooksack River basin and certain adjacent streams.	25.	Maximum, minimum, and average of the monthly discharges, in acre-feet, for the period 1949-53, Dakota Creek near Blaine.....
8.	Water development projects, Nooksack River basin and certain adjacent streams.	26.	Discharge, in cubic feet per second, equaled or exceeded for specified percent of time-- 1945-53, Dakota Creek near Blaine.....
9.	Stream areas utilized by migratory fish in Nooksack River basin and certain adjacent streams.	27.	Streamflow evaluation.....
		28.	Existing lakes and reservoirs in the report area
